Q Z E B O

VISION

With our range of products, we are specifically focusing on the ecological aspects connected to a new lifestyle, where the outdoors symbolize being in touch with nature, where boundaries disappear and change. Our systems, working with renewable energy sources, are a valid answer to the need to preserve the world that we share with all living beings, to respect it and to keep it untouched.

MISSION

The legacy we have been carrying on for over thirty years is a centuries-old tradition, strongly connected to the Earth and its bounty. Our mission is loyal to the spirit of cultivating, ploughing, manuring, watering, and harvesting. Faithful to our model, we cultivate human relationships and coordinate production with harvest seasons – just as it happens in nature. This modus operandi helped us to create a design tailored to evolving markets, and consolidating an organic, consistent set of corporate ethics that creates value and opportunity.

MODERN

DESIGN

GAZEBO

Q Z E B O

Qzebo is a one-of-a-kind modern gazebo. It revolutionized the clichéd dome shape, the classic spire, or round dome. With its almost linear roof, Qzebo represents a design never seen before. Qzebo is a reinterpretation of a gazebo, that leaves back traditions to mark the breaking point from the traditional archetype. Qzebo is the answer to the growing market demand for an innovative gazebo. The warm colors and the mat finish, hoven painted with high resistance epoxy powder, improve the product's resistance and make it a cozy-looking product, which sits in harmony with nature and the outdoors. The structure can be complemented with a number of accessories, such as the sliding edging profiles with PVC or glass membranes, decorative drapes, telescopic windshields made of glass. In order to optimize the comfort inside the structure, infrared heating and LED perimeter lighting are also available.
