VISION

With our range of products, we are specifically focusing on the ecological aspects connected to a new lifestyle, where the outdoors symbolize being in touch with nature, where boundaries disappear and change. Our systems, working with renewable energy sources, are a valid answer to the need to preserve the world that we share with all living beings, to respect it and to keep it untouched.

MISSION

The legacy we have been carrying on for over thirty years is a centuries-old tradition, strongly connected to the Earth and its bounty. Our mission is loyal to the spirit of cultivating, ploughing, manuring, watering, and harvesting. Faithful to our model, we cultivate human relationships and coordinate production with harvest seasons – just as it happens in nature. This *modus operandi* helped us to create a design tailored to evolving markets, and consolidating an organic, consistent set of corporate ethics that creates value and opportunity.

R E A D Y B O X T U N N E L

READY BOX retractable tunnels are made of aluminium for durability, mobility, and ease of use. They offer a customized solution to meet various mobile roofing needs, such as sports, industrial, residential, commercial and logistics applications, without requiring special permits or installation approvals. Depending on the model, we have a variety of configurations that allow versatile use with variable geometries and the possibility of future extensions in length, thanks to the modularity of the structure and the sheets inserted individually in the special lugs of the profiles of each arch. READY BOX tunnels are retractable and foldable roofing systems on wheels, guaranteeing maximum manoeuvrability for the materials used and high weather resistance. Our retractable tunnels are certified for their wind resistance and are made of fully fireproof PVC sheets. The market demands flexible, lightweight, and easy-to-install systems. Aluminum tunnels can be extended in minutes with minimal effort. Steel tunnels cannot meet this requirement, as they are difficult to close due to their weight, and their handling can only be managed with special equipment and a considerable investment of time.

READY BOX 6

The tunnels can be easily retracted and extended without the need for motorized systems. The use of a retractable aluminum tunnel offers agility and speed of movement while providing the same performance as a fixed structure. The great advantage is the possibility of installation without the need for specific authorizations. All tunnels of the READY BOX series are developed according to the UNI EN 13782:2015 standard for temporary structures.

GUARANTEE AND QUALITY

- The products are CE certified. The booklet with the DOP declaration of performance accompanies the product until its complete installation.
- Fireproof certificates are provided for each type of fabric used.
- The structures are structurally checked and comply with the loads required by the standards in force UNI EN 13782:2015 Temporary structures - Tents - Safety, DM 17 January 2018 Technical construction standards and UNI EN 1999 Eurocode 9 - Design of aluminum structures.
- The aluminum structural elements are guaranteed for five years*.
- Since 1990, we design and manufacture our collections entirely in Italy in our factory in Poggio Renatico.

* For more details on the guarantee, please refer to the general conditions of Giulio Barbieri S.r.l. published in the official price list.

FABRIC MAINTENANCE AND REPLACEMENT

- Giulio Barbieri tunnels are made of aluminum, which is naturally not subject to corrosion, and therefore does not require maintenance. All parts are easily replaceable, including the PVC fabric. The PVC modules are designed to be easily removed and replaced. This makes it possible to periodically and inexpensively change the tunnel's graphic personalization.
