SOLAR PERGOLA

N A K E D

Naked is the Giulio Barbieri photovoltaic pergola that responds to the ever-increasing needs of autonomous and renewable energy production.

Naked performs the dual function of shading arbor and support structure for high-performance photovoltaic kit. Naked can be enhanced with optional extras such as sliding roof, LED lights, and perimeter locks.

5

REASON TO CHOOSE NAKED SOLAR POWER

1 PHOTOVOLTAIC ENERGY

Naked is the ideal photovoltaic solution, producing clean and immediately available energy to cover the needs of a family of 5 people.

2 SNOW LOAD

Naked, whose maximum dimensions are 600 x 500 cm, is able to withstand a snow load of 48 daN/m² for the standard version and 150 daN/m² for the reinforced version.

3 DOESN'T REQUIRE MAINTENANCE

Naked's simplified structure is built to allow cleaning and maintenance of its aluminum profiles and the roof, in case it is in the presence of trees and plants that lose their foliage during the winter season.

4 EASY TO ASSEMBLE

Ease of installation translates into overall savings for the end user, which represents value for money.

5 INTEGRATED LIGHTING

The Naked pergola has an integrated lighting system on the roof, composed of white or RGB LED strips with indirect light. The lighting options include three specific solutions that mean that every request from your customer can be taken into account.
